TRACK ADJUSTERS

Recently added to the TUFF® range is a comprehensive selection of track adjuster assemblies for many of the popular excavator models on the market.

Maintaining correct track tension is critical for ensuring satisfactory track life. Track adjusters are designed to absorb shock and provide proper track tension, thus protecting idlers and track systems. Weak or broken recoil springs and poorly functioning adjusters may shorten track and idler life.

- » DESIGNED AND MANUFACTURED TO OEM SPECIFICATIONS
- » FULLY TESTED AND INSPECTED TO ENSURE CORRECT FITMENT AND PERFORMANCE
- » AVAILABLE FROM STOCK TO FIT MANY MODELS OF EXCAVATORS

FINAL DRIVES

OEM South Korean final drives are available for a wide range of excavators from 1 - 8 tonnes, giving machine owners a guaranteed cost effective alternative to the genuine part. Our experienced sales team has a wealth of final drive knowledge to ensure we fulfill your final drive requirements quickly and cost effectively.

- » OEM QUALITY FOR COMPLETE PEACE OF MIND
- » GUARANTEED COST EFFECTIVE ALTERNATIVE TO GENUINE PARTS
- » MANY MODELS AVAILABLE FROM STOCK
